makeone

2012 to Present

Members:Simon Shields

Combine multiple bible webpages into one

Merges many free html bible files into one. Also in Religion Page.

contains makeone.exe program to make many html files downloaded from http://bibledatabase.org/html_bible_files.html into one. Unzip this file in windows in the directory where the bible html files reside then start vmakeone.exe. Select the infile and outfile then click on Create. Click on Open to open in a browser.

To create a PDF download openoffice from <http://openoffice.org> and install.

Open the consolidated htm with OpenOffice Word Processor swrite and export as a PDF file.

Grafit

2012 to Present

Members:Simon Shields

PerlTk -> EXE using perl2exe

Do Quick Bar, HBar and Pie Charts
Line Graphs to be included in the next release

Editlist

2012 to Present

How TO Guide to getting Telstra 4GSierra Aircard Working in Ubuntu

How To Root An Android mb526

2011 to Present

Members:Simon Shields

How to Remove a Pesky Account WITHOUT doing a factory reset!!

I rooted my Android Smartphone a motorola MB526. I had to do this because I needed to remove a mail account that was no longer relevant. When I went to remove the account my phone complained that other applications were attached and it went onto inform me that to do this I would need to do a factory reset first. Major bummer, this would mean losing all the changes I had made to my phone, losing all my contacts and photos, videos, apps along the way. It would be like reinstalling your operating system on a laptop.

MB526 File Manager Notes

2012 to Present

Members:Simon Shields

Windows

Motorola_End_User_Driver_Installation_5.9.0_32bit.msi

MotorolaDeviceManager_2.2.28.exe for windows Macintosh MDM_Installer_2.0.32.dmg for mac

....

Netcool Notes

2013 to Present

Members:Simon Shields

Notes made from using installing & configuring Tivoli Netcool Products. Mostly old notes and refer to old Micromuse versions of the Netcool suite of Alarm Management Products.
